Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael E. Whitham on 10/7/05.

The application has been amended as follows:

In the Specification:

On Page 1, in the Continuing Data, line 12, delete the "_____" and insert --August 20, 2002-- after "filed on".

On Page 14, line 5, delete "http://www." On line 10, delete "http://www." On line 11, delete "http://www."

On Page 15, line 5, delete "http://www."

In the Claims:

In Claim 10, after "immunogen is" delete "parasitic" and substitute --from a parasite--.

Cancel claims 18 and 22-39.

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not identify the mailing address of each inventor. A mailing address is an address at which an inventor customarily receives his or her mail and may be either a home or business address. The mailing address should include the ZIP Code designation. The mailing address may be provided in an application data sheet or a supplemental oath or declaration. See 37 CFR 1.63(c) and 37 CFR 1.76.

The following is an examiner's statement of reasons for allowance: The prior art does not teach or suggest the generation of recombinant dsRNA phage which comprises a CITE or IRES element operably linked to a nucleic acid sequence to be expressed in eukaryotic cells. All dsRNA phage are classified in the Cystoviridae and include only 8 members (see Poranen et al., *Virus Res.*, 2004, Vol. 101, pp. 93-100). The prior art does teaches isolation of dsRNA phages, characterization of their genomes and packaging mechanisms but does not teach use of dsRNA phage, comprising a CITE or IRES element, as an expression vector for use in eukaryotic hosts (see Mindich, *Micro. Mol. Biol. Rev.*, 1999, Vol. 63, No. 1, pp. 149-160 and Mindich et al., *J. Bacteriol.*, 1999, Vol. 181, No. 5, pp. 4505-4508).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
